THE RECENT FLURRY IN THE MONEY MARKET.

THE events of the past few days add another to the numerous illustrations of the oft-repeated statement that under a deranged and depreciated currency it is next to impossible to foresee the changes of the loan market which is sensitive to imaginary, as well as to the ordinary real causes of stringency. On Tuesday loans on call were, as they had been for some time before, in fair demand at 6 per cent in Wall Street. Money was easy, and neither lenders nor borrowers saw even a speck of cloud in the financial horizon. Suddenly, however, about an hour before the closing of the banks, a change came on. Everybody seemed to want to borrow and scarcely any body was willing or able to lend. The origin of this sudden pinch, as we have hinted, was chiefly imaginary. The supply of loanable capital was, as it commonly is, in excess of the demand. The currency in the vaults of our banks was ample; the legal tenders having accumulated to a heavy amount, and the supply of

national bank currency being very much greater than in the present dull state of business is required for the limited transactions now doing.

What, then, was the change to which so sudden and so severe a spasm must be ascribed? Capital was abundant, currency was abundant, but confidence was disturbed. Every capitalist who had funds to lend, and every bank which had a surplus left over, became morbidly and unusually timid. Many of them would not lend. Others, fearing that they would soon have pressing need for all their available funds, called in their demand loans and refused to lend again except at higher rates.

A variety of rumors were put in circulation which helped to excite the public mind and aggravated the intensity of the trouble. One of these arose out of the government sales of gold, which were necessitated by the payment of the interest on the seven-thirties. The amount of these sales was greatly exaggerated, and it was said that instant payment in greenbacks was demanded by the Treasury agent—a condition with which the banks could not comply without seriously compromising their position and drawing down their reserve.

Another set of rumors declared that the compound interest notes were to be no longer held as a reserve by the banks and that they would be obliged immediately to go into the market and sell their compounds or other securities to get greenbacks enough to serve as their legal reserve. It was added that all the banks throughout the country were in a condition of tremulous incertitude, that the country balances in our leading banks would be drawn down immediately, and that the financial prospects of the country were never so gloomy.

It is no wonder, therefore, that for a short time on Tuesday the money market was in a condition verging on panic. The next day, however, it was discovered that by the excellent arrangements made by Mr. Van Dyck, the Assistant Treasurer, all the payments on account of the negotiation of gold were made promptly, and with apparent ease; not a single bank made application for an extension; and what was a still more satisfactory and significant proof of the strength of the banks, there were no withdrawals of their temporary deposits from the Sub-Treasury.

A more gratifying circumstance still, in many points of view, is the rapid recovery of the market from so severe a blow. The recuperative powers of this country, and the hopeful, resistless energy of our people, substantial stability of our financial machinery were never more conspicuously dis-

played than in this elastic rebound, which has never yet failed to succeed, and swiftly to obliterate the traces of every temporary panic. If Congress and the Secretary of the Treasury continue to adopt the same unswerving conservative policy which has enabled us during the past year to borrow over 1,400 millions of dollars, and, at the same time, to contract the currency to the extent of 200 millions, without impairing the elasticity or the strength of our financial system, and without producing a single spasm which was not of a transient, limited and fugitive character, we may still believe, notwithstanding the sinister forebodings of the croakers, that we shall get gradually back to specie payments without more severe disasters than we have had heretofore, and that the long predicted "crash" may be deferred to the Greek Calendar.

As to the rate of interest, it has risen to 7 per cent, and as we always find that the rate is slow to descend, and remains stubbornly fixed after the forces which put it up have ceased to operate, there is probably little prospect of an immediate return to an easy six per cent money market. Moreover, there are certain incipient causes in operation which tend to give an uncomfortably feverish and unsettled aspect to monetary affairs. Their presence should inspire us with caution.

COMPOUND INTEREST NOTES AS BANK RESERVE.

We regret to see that the Committee on Banks and Currency have reported favorably on Mr. Hooper's proposition to prevent the National Banks from keeping compound interest notes as a part of the 25 per cent reserve required by law to be kept in their vaults. These institutions are already prohibited from keeping such notes as a reserve for their circulation. But Mr. Hooper proposes to go further and to extend the prohibition to the reserve held against the deposits also. Congress has a clear legal right to enforce such an arrangement but we much doubt its expediency at the present moment.

The only reason urged for it is that the National Banks are making too much money out of the Government paper they hold, and that they ought not to expect to get any interest on their reserve. If this reserve were specie or greenbacks it would earn no interest; but if it were compound notes they would grow more valuable till maturity, when they are worth nearly twenty per cent. more than their face.

It may be asked, however, who will gain what the banks lose by the change? To make Mr. Hooper's argument of any avail some national good must be shown to be likely to result from preventing the banks making a profit on their reserve in this way. And we fail to see any such good: while some serious evils are to be apprehended from it. For in the first place it will tend to expand the active currency. The compound notes, as is well known, have ceased to pass freely from hand to hand. Even those which do not yet sell at a premium are held by multitudes of persons, for investment. Over one hundred millions of the older notes are in the vaults of the banks. The proposed new arrangement would throw a large part of them on the market. How much they would fall in price may be inferred from the fact that they went down one per cent. the very day the public learned that the Committee had reported favorably on the scheme. There is little doubt that all these notes except the older ones would cease to bear a premium, and in proportion as this happened they would resume their functions as active paper money, and would begin again to exert just as much influence on prices as any other currency.

It is true that the inflation thus produced would, in part, be neutralized by the plan of the compound notes in the bank coffers being taken by greenbacks. But this would be

the case to a limited extent. Many of the banks now hold a much larger reserve than the law requires. Their position is thus strengthened to meet any of those panics and monetary spasms which may await us in our perilous path towards resumption of specie payments. The fact that their reserve is earning interest enables the banks to hold a liberal amount, and their risk is to augment it. But if we make greenbacks the reserve, this salutary movement will cease, their wish will be the other way and our banks throughout the country instead of piling up as much reserve as they can carry, will be tempted to keep it down to the lowest possible point. The compound notes, therefore, which they sell from their vaults, will not be replaced by an equal number of greenbacks, but by as much smaller an amount as can be made to suffice. And as the public will probably cease to hoard the notes when they begin to fall in market value an additional inflating agency will come into play. Many millions now in private hands will be thrown on the market and will cause no small derangement of the currency.

Moreover, no person who is practically acquainted with the extraordinary sensitiveness of our money market will expect that such a transaction, when it takes place, could fail to produce a spasm of serious extent and duration. There would be a general rush for greenbacks, with the usual consequences. A more important evil still, however, is the disturbance which Mr. Hooper's proposition would introduce into the machinery now at work in contracting the currency. The compound interest notes, as has been fully proved by facts, constitute the most gentle, elastic, and powerful machinery for contracting the active currency without deranging the loan market, that has ever been set in operation in any country for this purpose. By its benign and effective influence we may hope to reduce gradually the inflating power of our currency, until our paper dollar shall rise by safe degrees in purchasing power, and become once more equal in value to a dollar in gold. Every country that has heretofore been cursed with a depreciated currency has reduced its volume by a series of severe depletions causing jerks and panics in the money market. Relying on this method which American financial science has set in operation we may probably entertain a well-grounded confidence that the prostration of credit, the disturbance of commerce and trade, and the ruinous financial convulsions which have always made memorable and disastrous the reform of a depreciated currency will, to a great extent, be avoided.

Now, of this contracting machinery of ours, the compound notes are one essential part. The impulse to hoard these notes is the effective power which sets the machinery going, and keeps it in equable motion. Let us beware how we tamper with this public confidence, and risk general depreciation of the compound notes. For in all monetary affairs of this character confidence is easily wounded and slow to revive.

MR. SPINNER AND THE TAX ON BANK DEPOSITS.

We published in our last two numbers the correspondence between our city banks and Mr. Spinner, the United States Treasurer at Washington, relative to the controversy which has arisen out of the fact that the banking law of 1864 imposes a semi-annual tax of $\frac{1}{4}$ per cent. on the average deposits of the National Banks. Up to a recent period, the banks have very properly computed this tax on the amount of their net deposits; but with this method of computation Mr. Spinner is dissatisfied, and insists that the banks shall in future pay the tax on their gross deposits, intending that until the returns are made to his satisfaction and in the way he directs, he shall feel it his duty to stop the

payment of the interest due March 1st on the Ten-forty bonds registered as the property of the recusant banks. After several meetings and much discussion, the banks of this city have appointed a Committee to wait on Mr. Spinner to confer with him on the subject, and the banks of other cities are reported to have adopted similar measures.

Some of our readers may very naturally inquire how it is that a question pertaining to an internal revenue tax should be referred to Mr. Spinner, the U. S. Treasurer; when it obviously belongs to the Internal Revenue Bureau, and might, therefore, be naturally expected to have been referred to Mr. Commissioner Rawling, or to the Secretary of the Treasury. The answer is that for some reasons, which have not been explained to our entire satisfaction, the National Banks are not permitted to pay their taxes to the ordinary internal revenue officers. In 1863 these taxes were paid to the Comptroller of the Currency, and in the subsequent years to the Treasurer of the United States. But, as the last banking law makes the provision that the banks shall make their returns for taxation on circulation, capital, and deposits in such manner as the Treasurer shall prescribe, Mr. Spinner takes the ground that he is empowered to interpret and apply the law in such a way as to protect the public revenue; and we believe that, except in this single point, his arrangements relative to the banks have been perfectly satisfactory both to those institutions and to the Treasury Department. Mr. Spinner is well known to be a zealous, upright, efficient public officer, whose services have been highly valued by the various Secretaries of the Treasury under whom he has faithfully served. He is also, no doubt, too able and too just a man not to recede promptly and gracefully whenever he can be convinced that he has taken a wrong step.

It is much to be regretted, therefore, that for the first time the relations between Mr. Spinner and the banks should have assumed, at such a crisis as the present, an unfriendly and acrimonious character, and this change is ascribed chiefly, we believe, to the unnecessary acerbity of his last letter to the Bank Committee of this city. Without entering, however, upon any such irrelevant topics, which are of merely subordinate and personal interest, we will endeavor to state the main points of the case as they are represented to us. The law requires, as we have said, that the banks shall report to the Treasurer the amount of their capital, their circulation, and their deposits, as a basis for the semi-annual computation of the internal revenue tax they have to pay, and these reports are to be made in such manner as the Treasurer shall prescribe. Now, with regard to the returns of capital and circulation, there is no controversy. What Mr. Spinner is dissatisfied with is simply the returns of the deposits, and he claims that their amount has not been reported to him as it stands on the books of the banks of our large cities on the evening of the day appointed for making up the statement.

To this the banks reply that in this city and elsewhere, if Clearing Houses are established, the whole of the business of any given day is not completely posted in their books till the following morning; so that the real amount of deposits which John Doe or Richard Roe may have in bank cannot be known by inspecting his account at night, but can only be discovered after the Clearing House disclosures of the next morning shall have shown how much of his money he had drawn out by checks which have found their way into other banks. It follows from this statement that no bank of this city keeps its books so as to show at the closing of the doors at night the precise aggregate of deposits it has in hand. All that the President and Cashier know is that their dealers have deposited a given amount during the day, say millions; that checks have been presented for certifi-

cation to the amount of perhaps seven millions; and that when these checks and others which are uncertified shall come to light and are posted up next morning, the ten millions of deposits will probably be reduced to two millions.

These figures are not imaginary. They represent the real business of one of our active banks in Wall Street. Mr. Spinner insists that this bank shall pay its tax on ten millions, while the bank claims that it is justly chargeable on two millions. That Mr. Spinner is wrong and the banks right in this controversy there appears to be no doubt whatever. If Mr. Spinner's interpretation of the law were to prevail, and the tax were computed on the gross deposits, it is obvious that a considerable amount would be taxed twice over. In the case of the bank we have just referred to, whose gross deposits are ten millions and its net deposits two millions, the government would not lose the tax on the difference of eight millions, because every dollar of it is reckoned in the deposits of some one or other of the Clearing House Banks.

But why, it has been asked, do not the banks keep their books differently? Why can they not make their clearings in the evening? This would meet Mr. Spinner's views. But it is a change not contemplated in the law, and it would curtail banking hours, derange business facilities, and inflict an annual loss, and risk as we are informed, to the extent probably of much more than the aggregate amount of the taxes paid by all the National banks in the country.

It is on every ground to be desired that this unfortunate controversy should be settled without an appeal to the courts of law. And the probability is that Congress will at an early day take measures to simplify the taxes on the banks by repealing those on capital and deposits and raising an equal or greater amount of government revenue from a tax on the circulation only.

THE PROPOSED NEW TARIFF ON WOOL.

THE interruption of the cotton supply has very materially stimulated our woolen manufactures. Since 1861, the high price of raw cotton has rendered certain woolen fabrics cheaper and more available than cotton manufactures for a variety of purposes; and consumption has consequently been diverted, to an important extent, from cotton goods to woolens. At the same time, the immense demand for woolens, for military and naval purposes, has given employment to a large amount of woolen machinery; which, in connection with steadily advancing prices, has rendered the manufacture of woolen goods highly profitable since 1861. This condition of affairs has naturally induced such a large increase of woolen machinery, that the capacity of our mills now largely exceeds the current supply of domestic raw material. The increase of machinery has run especially upon looms adapted for the manufacture of fine goods, for which we had, previous to the war, to depend almost exclusively upon foreign fabricants. Doeskins, fine fancy cassimeres, cloths, heavy coatings, and wool shawls, are now made in the United States to a very much larger extent than before 1860; and importers have been gradually surrendering this class of trade to domestic producers.

It is estimated, upon statistics collected by the Woolen Manufacturers Association, that the present capacity of our woolen mills is equal to a consumption of 200,000,000 pounds of prepared wool per annum. Toward meeting this consumptive capacity, the domestic wool crop contributes about 100,000,000 pounds, which in its cleansed condition would represent about 55,000,000 pounds, or a little more than one-fourth the capacity of the mills. For the remainder of the supply of raw materials we have to depend upon imported wool, upon fleeces and shoddy, and upon cotton. With such a disproportion between the domestic supply of wool,

and the capacity of the mills, it would seem that the wool-growers have a sufficient guarantee for the securing of fair prices for their staple.

For reasons, however, which do not appear very obvious to common sense observers, the wool-growers, through a committee of their association, have petitioned the Committee on Ways and Means to propose to Congress a material enhancement of the duties upon foreign wool. They propose that, in lieu of the existing duties—viz.: of 3 cents per pound on wool costing 12 cents and under, and of 6 cents upon that costing over 12 cents, and not exceeding 24 cents—there shall be a uniform duty of 10 cents per pound, and 10 per cent *ad valorem*, upon all wool costing 24 cents and under. The proposed changes are intended to discriminate against certain foreign wools, which compete most directly with the domestic crop, with a view to enabling home growers to supply to the mills the whole of their raw material. As the proposed change would increase the price of foreign wool, invoiced at 12 cents or under, about 11 cents per pound, and wool costing from 12 cents to 24 cents, about 8@9 cents per pound, it is obvious that the suggested change is one of much practical consequence. The question is to be viewed in its bearings upon the wool-growers and the woolen manufacturers.

The wool-grower is obviously interested in supplying the manufacturer with raw material at rates which will enable him to compete with foreign fabricants; for, without that condition, domestic manufactures must droop, and the demand for home wool be curtailed and its value reduced. This, however, is an attempt to increase the price of wools about twenty-five per cent. It is unnecessary to inquire what would be the effect of such a rise in raw material, for it is capable of demonstration that no such advance can really be permanently established. The course of prices under past tariffs proves that the duties upon foreign wools are powerless in regulating prices. The tariff of 1846 imposed a duty of 30 per cent, *ad valorem*, upon wool costing 18 cents per pound or under. In 1857 that class of wools was made duty free; and in 1861 the duty upon that grade was fixed at 5 per cent, *ad valorem*, and so remained until 1864. The course of prices after the change of duty from 30 per cent to 5 per cent is illustrated by the following comparison, showing the average prices of Ohio, Mestiza, Cuba and Mexican wools, for the two years 1855 and 1856, and for the two years 1862 and 1863, when the lower duty was in force, the prices being given for the latter years in gold:

| | Ohio f. bl. fleece. cents. | Mestiza No. 1. cents. | Cape, unwashed. cents. | Mex. med. washed. cents. |
|----------------------|----------------------------------|-----------------------------|------------------------------|--------------------------------|
| Average 1855-56..... | 45 @ 47½ | 16½ @ 19½ | 29½ @ 32 | 19½ @ 22½ |
| do 1862-63..... | 48½ @ 51½ | 19 @ 21½ | 22½ @ 25 | 22½ @ 25½ |
| Advance..... | 3¼ @ 3½ | 2½ @ 2¼ | 7¼ @ 4 | 3¼ @ 3½ |

It thus appears that, under a reduction in the duty from 30 per cent to 5 per cent, upon this particular grade of foreign wool, the price of the imported staple, instead of declining, so as to depreciate domestic wool, actually advanced, upon an average, about 15 per cent, and was attended with an important rise in the home product, Ohio fleece averaging 3¼@3½ cents higher in the years 1862-63 than in 1855-56. Here, then, it is clearly shown that low duties upon foreign wool are more favorable than high to domestic growers.

Nor is it less susceptible of demonstration that high duties have been attended with a decline in the value of of the domestic crop. The following comparison, showing the average prices, in gold, at New York for the leading classes of domestic and foreign wools, will afford data for comparing the market value of wool under the tariff of 1861, and that of 1864:

| 4th "..... | 193 | 48@52 | 41@44 | 36@45 | 18@26 | 24@30 | | | |

From a careful analysis of these statistics, it will be found that, since the duty upon foreign wools, invoiced at 18 cents or less, has been increased from 5 per cent, *ad val.*, to 3 and 6 cents per pound, the price of domestic wools has averaged lower, while that of imported has been only nominally increased. For the purpose of illustrating this fact we present the following comparison of average prices, of wool from July 1, 1861, to June 30, 1864, when the lower duties were in operation, and from July 1, 1864, to December 31, 1865, the period of enhanced duties, designating the two periods as those of low and high tariffs:

| | Ohio. | N. York. | Illinois. | Mestiza No 1. | Cape. |
|------------------|---------|----------|-----------|---------------|---------|
| Low Tariff..... | 45½@50 | 44½@47 | 41½@44 | 18½@21½ | 23½@27½ |
| High Tariff..... | 45½@49½ | 41½@46 | 38 @34 | 17 @23½ | 24 @30 |
| Advance..... | | | | | 1½ @ 2½ |
| Decline..... | | ¾ @ 1 | 3½ | | |

Here, again, it is evident how impotent are tariffs to regulate prices. The large increase of duty in 1864 on the lower grades of foreign wool, expressly intended to enhance the price of the domestic staple, has been followed by an average decline in the value of Ohio, New York and Illinois wool, while Mestiza wool has remained stationary, and Cape has risen only 1½@2½ cents. It is impossible to resist the conclusion indicated by these facts. Legislation cannot compel manufacturers to pay beyond a certain price for raw materials; for when that limit is exceeded the consumption is curtailed, and a consequent increase of supply over demand brings back prices to their former level. On the other hand, as shown by the above allusion to a change from a 30 per cent duty to a 5 per cent duty, the comparative absence of legislative restrictions is attended by an expansion of commerce which enables the domestic producer of raw material to secure much higher prices for his products than when the foreign competing staple is heavily taxed.

It is most important to keep in mind that the proposed additional discrimination against foreign wool is directed especially against a class of wool our own growers do not produce. Domestic wools do not possess the fulling qualities necessary for the manufacture of the finer class of fabrics; and, in plain terms, it amounts to this, that if the large amount of machinery introduced within the last seven years, for the manufacture of the classes of goods we have been wont to import, cannot be allowed to have its appropriate raw material, the mills must be closed, the machinery must rot, and the goods be imported from Europe. It is quite possible that the proposed legislation may seriously cripple domestic manufactures by preventing them from ensuring all the conditions necessary to success; but it is certain that it can never benefit the home wool growers through compelling manufacturers to use a kind of raw material not adapted for their purposes. The true policy for the wool growers is to consent to manufacturers having every facility for getting the cheapest raw material the world produces. By that course our manufactures will be extended; our enlarged purchases of raw material in foreign markets will increase the price of wool there, which will have the two-fold effect of enhancing the cost of the European fabrics brought here to compete with domestic goods, and further, of correspondingly

increasing the value of home grown wools, so that both manufacturer and wool grower would be protected by a natural and always reliable process.

ANALYSES OF RAILROAD REPORTS. NO. 15.

ERIE RAILWAY.

The Erie Railway consists of the under-named roads and branches, together making a total of 808 miles :

| Roads owned by the Erie Company— | Miles. |

| The Company also lease and operate the following railroads, but their accounts are stated separately and apart from the statements which follow, viz : | |
| Buffalo, New York and Erie.....Corning to Buffalo..... | 140 |
| Rochester & Genesee Valley.....Rochester to Mount Morris..... | 18 |
| And operate (not under lease) the Warwick Valley Railroad, Chester-ville to Warwick..... | 10 |
| Total length owned or leased and operated..... | 808 |

In operating these roads the Long Dock and Union Lines and the main Erie from Ramapo Junction to Dunkirk, together 460 miles, constitute the main line, and the eastern section of the Erie, from Ramapo to Piermont, 18 miles, is operated as a branch road.

On all the lines there are about 220 miles of second track and 160 miles of sidings, turnouts, etc.

It appears from this statement that the total for the year exceeds the total of any year since the war, because of the very heavy dry good imports last year. Our imports of cotton alone have decreased about six millions. We now give for comparison the previous years since 1851, classifying them into dutiable, free, and specie. Under the head of dutiable is included both the value entered for consumption and that entered for warehousing. The free goods run very light, as nearly all the imports now are dutiable.

From the foregoing table it will be seen that the total imports are larger this year than any we give, except 1859. This is due in a great measure to the limited supply of foreign goods for the previous three years, and the consequent increased demand at the close of the war. Consequently, the receipts at this port have during the last six months of 1865 been double those of the first six months. Below we give a detailed statement showing the receipts from foreign ports during each month of the year, for the last six years, both of dutiable and free goods, and what portion were entered for warehousing, and the value withdrawn from warehouse:

An Act to create a Metropolitan Sanitary District and Board of Health therein, for the Preservation of Health, and to Prevent the Spread of Disease.

After a contest of weeks, the Legislature of New York, having tossed the Metropolitan Health Bill like a football from one House to the other, amending and re-amending it, has brought the controversy of eight years to a close by concurring in the report of their Conference Committee. The bill did not reach the table of Gov. Fenton till he had left for Washington, but will be speedily signed upon his return to Albany. The public mind will at least be set at rest, and the extraordinary provisions will go into effect, we presume with approval, by those who believe in regulating their everyday life by specific legislation.

In 1858 the four Senators from this city, Messrs. John C. Mather, Smith Ely, Jr., Richard Schell, and John Dougherty, were appointed by the Senate a Committee to sit during the recess for the purpose of taking testimony in relation to the sanitary condition of New York. Their report, published in 1859, shows a careful and rigid performance of this duty, and is thoroughly exhaustive. A Health Bill was prepared, which passed the Senate, and was lost in the Assembly, owing to the treachery of a member from New York.

The attempt was renewed in 1860, and a bill introduced creating a Metropolitan Board of Health to supersede the present Board, the City Inspector and Street Commissioner. After interminable delays it was placed on its third reading, when Mr. H. B. Miller,

of Erie, opened fire upon it, and it was lost. Hon. Lucius Robinson, in 1861, renewed again the effort, and under his lead the bill actually passed the Assembly; but the furor of patriotism which followed the firing upon Fort Sumter was employed by the adversaries of the measure to deter its friends from pressing it in the Senate. In 1862 it again passed the Assembly, but was lost in the Senate, aided by the operations of the Committee on the Internal Affairs of Towns and Counties, to which it had been referred. No sanitary legislation was attempted in 1863, owing to the political dead-lock in the Assembly. In 1864 the Committee on Public Health of the Assembly did not report the bill. Last winter a bill very similar in its provisions to the one just passed, except that it did not abolish the City Inspector's Department, was introduced by Mr. Laimbeer, and passed the Senate. It was adopted as a party measure by the Union caucus of the Assembly, but was lost on the third reading, by reason of the defection of several members. In January last the bill was introduced again into the Senate by Mr. Lent, and in the Assembly by Mr. T. E. Stewart. It proposed to create a Board of Health of eight members, the four Police Commissioners and four physicians named in the third section. The Senate passed it in this form, after which the Assembly amended it by substituting a Board of five Sanitary Commissioners, to be appointed by the Governor and Senate. The Senate refused to concur, and a Conference Committee, on the part of both Houses, agreed, as a compromise, upon a Metropolitan Board of Health, to consist of the Health Officer, four Police Commissioners, and four Sanitary Commissioners, three of them to be physicians, and one of the four to reside in Brooklyn. The bill in this form passed both Houses on Saturday, Feb. 17.

The bill includes the territory of the Metropolitan Police District in "the Metropolitan Sanitary District of the State of New York," and places it under control of "the Metropolitan Board of Health," constituted as before explained. The term of office of the Sanitary Commissioners is four years, one to expire every year, as determined by lot. These Commissioners vacate office upon accepting any other office or nomination for an elective office, and may be removed by the Governor under the provision of the law for the removal of sheriffs. Vacancies occurring during the recess of the Legislature are to be temporarily filled by the Governor. The Board, upon organizing, and annually thereafter, will select one of their number to be President, and another to be Treasurer; and also appoint some suitable person Secretary, who shall not be long to the Board. The salaries of the Sanitary Commissioners are fixed at \$2,500 per year; the Police Commissioners and Health Officer receive \$500 a year; the Treasurer an additional sum of \$500 a year.

All the powers of the present Boards of Health of New York and Brooklyn, the Commissioners of Health, Mayors and Common Councils of those cities, Presidents of the Boards of Aldermen and Councilmen, Resident Physician, City Inspector, etc.; relating to the public health are conferred upon the Metropolitan Board; but the duties of the Croton Aqueduct Board, Street Commissioner, Superintendent of Unsafe Buildings, City Comptroller, and the board authorized in 1865 to contract for the cleaning of the streets, are not affected. The President of the Board of Health, however, takes the place of the City Inspector as a member of the Street Cleaning Board. The department of the City Inspector is abolished, and his books and papers, the duties of registration of births, marriages and deaths, the preservation of vital statistics, etc., are vested in the Metropolitan Board of Health.

The executive functions of the Board are devolved upon a Sanitary Superintendent, "an experienced and skillful physician," and two assistant superintendents, one for New York and one for Brooklyn. The Board are also authorized to appoint fifteen "Sanitary Inspectors," ten of them physicians, to fix their salaries and define their duties and districts of inspection; also to employ clerks, servants, and attorneys, as may be necessary. The salary of the Sanitary Superintendent is limited to \$5,000; of each assistant to \$3,500; of the Secretary to \$3,500. The other affairs are subject to the action of the Board. Engineers may also be employed from time to time to make sanitary surveys, and drawings and plans relating to them. But except in times of peril to the public health, so declared by the Board and by proclamation of the Governor, the expenditures are limited to \$100,000.

Supreme power is conferred upon the Board of Health to declare that "any building, erection, excavation, premises, business pursuit, matter or thing, or the sewerage, drainage, or ventilation thereof in said district," in whole or in any particular, is a public nuisance, or dangerous to life or health. The Board may accordingly order the "nuisance" to be removed, abated, suspended, altered, or otherwise improved or purified. It may also "order or cause any excavation, erection, vehicle, vessel, water craft, room, building, place,

sewer, pipe, passage, premises, ground, matter or thing, in said district or the adjacent waters, regarded by said Board as in a condition dangerous or detrimental to life or health; to be purified, cleaned, disinfected, altered, or improved; and may also order any substance, matter or thing, being or left in any street, alley, water, excavation, building, erection, place or grounds, whether such place where the same may be is public or private, and which the said Board may regard as dangerous or detrimental to life or health, to be speedily removed to some proper place" selected by the Board. It is the duty of the Board of Police to execute these orders of the Board of Health, or the latter Board, if it deems proper, may execute its orders through its own officers and agencies. All expenses incurred upon private property under this act are made a lien upon the same.

All owners, tenants, lessees, or occupants of property in the district and persons carrying on business, or having charge of places or buildings are enjoined to keep the same in such condition as not to be prejudicial to life or health. Any member of the police force and every inspector or officer of the Board of Health, as the regulations may respectively provide, may arrest any person who shall violate, or be engaged in committing any act forbidden by this act or of any law or ordinance of the Board of Health, or who shall resist the enforcement of any order of the Board of Health, or of the Board of Police, in pursuance of such order, and the offence shall constitute a misdemeanor.

The Board of Health, the Health Officer and the Board of Quarantine Commissioners are required to co-operate together to prevent the spread of disease and for the protection of life and the preservation of health. There shall also be an interchange of sanitary information with the health authorities of the several towns and cities of the State for the same purpose; medical relief shall also be afforded to the poor, and hospitals established for the reception of patients sick with small pox and contagious diseases. The Board also, in concert with the Governor, may proclaim the presence of great and imminent peril to the public health, and in such cases may perform such acts and incur such expenditures as the exigency shall demand, the Board of Police may co-operate with the Board of Health and promptly advise of all threatened danger to life or health, and report to the latter all violations of its rules and ordinances. The authority of the respective Boards in relation to sanitary matters is the same as a special order of a justice or judge duly issued.

The Board of Health is required to report annually to the Governor upon the sanitary condition and prospects of the district, and its expenditures; and shall suggest further legislation whenever the same may appear to be required.

The Board may also enact a "Code of Health Ordinance" which shall be published on or before the 10th day of May in each year in two daily newspapers in New York and in Brooklyn; and afterward shall go into effect on the first day of June, to remain in full force for one year, unless annulled. All courts and tribunals, or any judge or justice of them, shall take cognizance and enforce such ordinances by penalties not exceeding \$50. The Board will also exercise the authority conferred by all laws relating to cleanliness and to the sale of poisonous, unwholesome or deleterious or adulterated drugs, medicine or food. The Board may also require information relative to the safety of life or the promotion of health, from public dispensaries, hospitals, asylums, infirmaries, prisons, schools; also, from all other public institutions, and from the proprietors, occupants, lessees and managers of theaters and other places of public resort or amusement in the sanitary district.

A special fund to be kept in the Treasury of the State, is created from the sums of money provided or raised for meeting the expenses to be incurred under this act. All payments shall be made from it under the order of the Treasurer of the Board as the Board shall direct. The Mayor and Comptroller of New York, the Mayor and Comptroller of Brooklyn and the members of the Board of Health are directed to convene at the office of the Board—at the Metropolitan Police Head Quarters—on or before the 1st day of August in each year as a Board of Estimate to make up an assessment for the expenses of the Board for the year. This estimate shall include also a written apportionment of the expenses to be awarded as the law directs to each county, city and town in the district—the salaries and compensation of members of the Board and the officers and employees, to the county where they belong; the general and contingent expenses to the counties of New York and King, and the expenditures incurred in the other counties, to the respective counties. The Board, in anticipation of the receipt of moneys for its current expenses, may borrow such amounts as may be required on the credit of this act.

All violations of the provisions of this act or of any order of the Board made in pursuance, or of any by-laws or ordinance referred to in it, together with obstructions or interference with any person in the execution of any order of the Board, or of any pursuant order of the Board of Police; and all wilful or illegal omission to obey such order, or to conform to any sanitary regulation of the Board; and all cases in which it was made a misdemeanor to do or omit to do any act, when any power or authority hereby conferred upon the Board of Health was exercised by any other Board or officer, are declared to be misdemeanors—subject to indictment and to an additional penalty of \$250.

It is the duty of prosecuting officers of criminal courts and police justices to act promptly upon all complaints and in all suits or proceedings for any violation of this act, to bring the same to a

speedy hearing, and to render judgment and direct execution without delay.

The 1st day of March is fixed as the day for the new Health Law to go into effect, and supersede all other sanitary authorities now existing in the territory of the Metropolitan Police and Sanitary District.

Latest Monetary and Commercial English News.

[From our own Correspondent.]

LONDON, Saturday, Feb. 10, 1866.

The course of monetary affairs in the early part of the present week was decidedly more favorable, and in the value of money there was a tendency—though not strong—towards ease. The improved state of our advices from Bombay, in reference to the money market there, contributed largely to this movement, and hopes were entertained in some quarters, more especially as the silver market had become flat at 61½d. per ounce for fine bars, that the Bank Directors would at no distant period reduce their terms of discount. As the week progressed, however, matters assumed a different aspect, and though their appearance called for no alarm, they were of a sufficiently unfavorable character to dispel the better hope that had gained ground of any early return to cheaper money. Among the causes of this change we may notice—firstly, the "settlement" in the Stock Exchange, the effect of which was an active demand for money for short periods in that establishment, and the consequent withdrawal of supplies from the open market; secondly, the maturing of a large number of Indian bills; and, thirdly, the renewed activity of the Liverpool cotton market. The first two causes, however, are but temporary, and therefore cannot exert any permanent influence; but the latter cause—the increased demand for cotton—is likely to operate prejudicially on the price of money; not, perhaps, in having the effect of advancing the rate beyond the present point, but of preventing any material or permanent reduction. It seems, however, probable that a reduction in the price of money will not now be delayed for any length of time; for although at Liverpool there are symptoms of a series of active, as well as advancing, cotton markets, trade in most other departments has become remarkably quiet—the transactions in the leading articles of food manufacture, as well as in manufactures themselves, having been quite of a hand to mouth character almost since the opening of the present year.

The return of the Bank of England is unfavorable and has been the cause of depression in the various Stock Exchange Markets. As, however, money is one-quarter per cent lower in the open market than at the Bank, the statement is by no means a just criterion of the position of monetary affairs, and therefore is of but little importance to the mercantile world. For instance the favorable feature is a decrease in other securities of £556,365, thus indicating a falling off in the demand for money, and a possibility of increased ease. The actual state of the money market is, however, quite the converse, money in the open market having become dearer. The return, however, shows a decline in the discount business of the Bank, the mercantile community having, for the present, transferred their business to the cheaper—the open market. The following table shows the position of the Bank and the price of consols at the present time in each of the last four years:

The comparison with last year is not very unfavorable, for although the assets of the establishment are £4,730,000 less than in 1865, the liabilities show a diminution, as compared with the same period, of £2,500,000. The French Bank return is more satisfactory, the stock of bullion having been augmented to the extent of £706,660, whilst there is a decrease in the amount of bills discounted to the value of £632,000, and a diminution in the circulation of notes of £1,232,000. The falling off in the demand for silver for remittance to the East may have produced this effect, for the Paris Money Market had become stringent in consequence of the operations of our own merchants and others in that quarter.

The demand for money here during the week has been good, and has increased as the week progressed. The requirements of dealers in the Stock Exchange have been extensive, so much so, indeed, that 8 per cent has been paid for loans for short periods. The maturing of a large quantity of Indian paper has also been the cause of considerable stringency towards the close of the week, and the aggregate transactions have been of good extent. The Bank rate remains at 8 per cent, the quotations for the best paper in the open market being as under:

| | 7½ | per cent. |

| 30 days' bills..... | 7½ | per cent. |

| 3 months' bills..... | 7½ | per cent. |
| 4 months' bills..... | 7½ to 8½ | " |

The discount houses have made no change in the rate of interest allowed by them for money on deposit. The rate on call is 5½; if with seven, 6½; and with fourteen days' notice of withdrawal, 7 per cent.

On the Continent, the tendency of prices in the discount market has been towards rather lower rates. The changes, as will be seen by the following statement, are by no means numerous:

At the commencement of the week, the market for Home Securities was firmer, and a slight improvement took place in the quotations. From that period up to yesterday, the fall in prices was about three-eighths to one-half per cent; but, to day, a better feeling has been observed, and the quotations have advanced in a slight degree. Foreign securities—apart from American—have mostly been firm. Mexican, Egyptian and Spanish descriptions having realised enhanced quotations. The Railway Share Market has been steady. Annexed are the highest prices of some of the principal home and foreign securities each day during the last two weeks:

The market for American securities has been rather quiet. United States 5-20's have been chiefly in demand, and have improved in value, the average quotation for the week being 67½. In other descriptions the fluctuations have been trifling; but the movement—where such has occurred—has been in an unfavorable direction. The total amount of business transacted in that market has been limited. The subjoined statement shows the highest prices touched each day in the course of the present week:

The prominent feature at Liverpool, as far as the cotton trade is concerned, is the activity in the trade for American cotton, resulting in considerable transactions to the disadvantage of other descriptions of that particular staple. During the greater part of the present week the demand for American cotton has been very active, and prices have advanced ¼d per lb. On the other hand, however, Brazil, Egyptian, and Turkish cotton has been very dull, and in these descriptions a decline of about ¼c per lb. has taken place. For Indian cotton there has been but little demand, nevertheless last week's currency has been supported. The sales of the week amount to 69,580 bales, viz.: 9,260 bales on speculation; 16,970 bales for export, and 43,350 bales to the trade. These figures show an increase of about 5,000 bales in the separate items of speculation, export, and consumption. The decline in the principal descriptions of cotton since the commencement of the year is greatest in Brazilian, and next to that in Surat. The following table shows the leading prices at the opening of the year and at the present moment:

| —Stock February 8, 1866..... | 536,660 | 429,310 | 124,350 |

The imports into Liverpool this week have been 77,823 bales, and the exports 23,387 bales. The quantity of East Indian cotton now afloat is 464,760 bales, against 254,160 bales last year.

From Bombay, to Jan. 27, I learn that shipments of cotton had made rapid progress, the exports for the fortnight prior to that date being about 100,000 bales. Old Dholerah was quoted at 17½; new Dholerah and Braoch, 16½ per lb. From Jan. 1 to Jan. 11, the actual shipments were 61,732 bales against 28,106 bales during the corresponding period in 1865.

Very unfavorable accounts continue to be received from Egypt respecting the crop of cotton in that country. The total shipments already show a diminution of 35,000 bales, and very little produce is coming forward. Hence, the statements which have been in circulation for some weeks of a probable deficiency have turned out correct, for it appears certain at the present moment that our imports from that quarter will fall short of last year by about 33 per cent. At the same time, the accounts from India continue to represent the cultivation of cotton as suffering a considerable diminution, whilst seeds are being cultivated to a greater extent. The prices now being obtained for oleaginous seeds in the London Market offer a large margin of remuneration to the grower, and as the Indian ryots feel certain that their cotton is not of sufficient length and flexibility to compete with the superior produce of America, they are wisely turning their attention to the more extended production of an article in which they enjoy a fair monopoly, Russia only being her great competitor in the market. The following is a comparison of the present prices of oilseeds with those of last year:

The Bankers' Gazette.

We give in our BULLETIN from day to day lists of bonds, &c., lost, and dividends declared. These tables will be continued daily, and on Saturday morning, such as have been published through the week in the BULLETIN will be collected and published in the CHRONICLE. Below will be found those published the last week in the BULLETIN.

The following dividends are announced—

FRIDAY, P. M., Feb. 23, 1866.

THE MONEY MARKET.—Monetary affairs have been disturbed during the week by large sales of gold by the Government. Since Friday last probably twelve millions of currency has been withdrawn in this way into the Sub-Treasury, while the amount paid out, on account of Seven-thirties has been merely nominal. The sudden loss to the market of such a large amount of currency has produced a sharp contraction among the banks, and an advance in the rate of interest. Outstanding loans at 6 per cent. have been generally put up to 7 per cent., which is the closing rate, with rare exceptions on Government collaterals at 6 per cent.

The discount market is comparatively quiet. The late difficulty in selling any except first class paper appears to have produced a contraction of credits, and there is consequently a much less volume of second class bills upon the market. The advance in the rate upon call loans has temporarily checked the demand for paper but without effect upon rates. Prime paper is discounted at 7@7½ per cent.; names classed "good" at 8@9 per cent, and other grades at 10@15 per cent, with a diminished supply of the latter class.

The following are the rates for the various classes of loans:

| | Per cent. | | Per cent. |
|-------------------------------------|-----------|--|-----------|
| Call loans..... | 6 @ 7 | Good endorsed bills, 3 & 4 months..... | 7½ @ 8 |
| Loans on bonds & mortg..... | 6 @ 7 | do single names..... | 8 @ 9 |
| Prime endorsed bills, 2 months..... | 7 @ 7½ | Lower grades..... | 10 @ 15 |

UNITED STATES SECURITIES.—The partial stringency in the money market has checked the buoyancy in national securities. Sellers have predominated during the week and prices are generally ¼@½ per cent. lower than at the close of last week. The open rupture between the President and the opposition in Congress, as developed yesterday at Washington, had a depressing effect upon securities this morning, putting down quotations a fraction.

The changes in the finance bill, suggested on Wednesday by Messrs. Hooper and Stevens, have had no appreciable effect upon any class of securities, the proposed modifications being rather in the details of the bill than its substance.

The advance in Five-twenties at London to 67½ in the face of a stringent money market and a decline in consols, however gratifying as an evidence of confidence in the credit of our Government, has little effect upon those securities on this side, the advance being set off by the decline in gold. The exchange of Five-twenties between this country and Europe has been merely nominal for some weeks; and late reports of the return of considerable amounts to New York appear to have had no adequate foundation in fact.

On the 1st of March, interest upon the Ten-forty loan falls due, amounting to \$4,319,252.

The following are the closing quotations for the leading Government Securities, compared with those of Saturday last :

RAILROAD AND MISCELLANEOUS STOCKS.—The stock market opened buoyant under the movements of a wealthy clique operating for a rise in prices. On Monday and Tuesday, prices generally advanced 2@3 per cent, the great trunk roads being especially firm. The clique movement placed reliance upon the supposed over-sold condition of the market; it turned out, however, that the "shorts" had already settled the larger proportion of their outstanding contracts. The consequent disappointment prepared the street for sympathizing sharply with the pinch in the money market developed on Wednesday, as the result of the large government sales of gold, and prices lost all they had gained on the preceding day. This morning, the market exhibited a partial recovery from the decline of Wednesday, prices being about ½ per cent higher: but the report of renewed heavy transactions in gold, by the Assistant Treasurer, produced another reaction, and the market closes on an average 1½ per cent below the concluding figures of last week.

It is deserving of note that important orders have been received from the West to sell the stocks of roads in that section on 30 to 60 days, sellers' option.

THE GOLD MARKET.—The government continues to sell gold in considerable amounts. On Saturday last and Wednesday about five millions were thrown upon the market; and since then probably an equal amount has been sold, making an addition to the supply of about ten millions during seven days. Foreign bankers who had been large sellers when the premium ranged about 40 have replenished their stock during the government sales, making a handsome profit by the operation. As the peculiar condition of monetary affairs in England renders it necessary for this class of houses to keep an ample reserve for shipments, in the event of emergencies, the gold which has gone into their hands will form no part of the supply for customs purposes, the chief source of demand; so that an important portion of the gold recently sold by the government has simply passed from one form of hoard into another. The market, however, is for the present sensibly relieved, an indication of which is afforded by the fact that 8 per cent is now being paid for having gold "carried."

The fluctuations in the premium have been slight, the highest price having been 137½ and the lowest 136½. The supply will be augmented early in March by the payment of over four millions of interest upon Ten-forty bonds, due on the 1st proximo.

The political developments yesterday at Washington were made the pretext this morning for a movement to send up the premium; the Assistant Treasurer, however, put a round sum upon the market, and the price fell to 136½, having opened at 137½.

The Aspinwall steamer brought on Wednesday \$1,227,009 in treasure.

The export of specie on Saturday last amounted to \$146,395.

FOREIGN EXCHANGE.—The continued scarcity of produce bills, in connection with the still heavy importations, has produced an important advance in the rates of Exchange. For Wednesday's steamer the leading drawers asked 108½ for 60 days sterling, and sold at 108½@108½. The advance, however, has checked the demand, and for to-morrow's mail the rates close lower, the best broker's sterling having been sold at 108½@108½.

The deviations from the returns of the previous week are as follows:

| | | | |
|-----------------------|-----------|-------------------------|-----------|
| Loans..... Inc. | \$459,380 | Deposits..... Inc. | 1,075,827 |
| Specie..... Inc. | 178,952 | Legal Tenders..... Dec. | 3,633,033 |
| Circulation..... Inc. | 742,805 | | |

The principal feature in the statement is the loss of \$3, 633,033 of legal tenders. This important change appears to be chiefly attributable to the withdrawals of currency for the purchase of gold sold by the government. Owing to the large additional sales made by the Sub-Treasury on Saturday last and since the decrease in legal tenders may be expected to show considerable augmentation next week.

The several items compare as follows with the returns of previous weeks:

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, Feb. 23.

There is a pretty fair trade, but on the whole business is less active than last week. The interruption of a holiday has had an unfavorable effect. The regular merchants seem disposed to buy no more than is necessary for immediate trade; and speculators find matters in so uncertain a state that they are loth to invest.

Cotton has been rather excited at a considerable range of prices, the influence of varying reports from Liverpool. The undoubted preference which is given to American cottons by European spinners is regarded as very encouraging to high prices.

Breadstuffs have declined, but close more firm and active. The stocks on the Atlantic seaboard are diminishing, while those at Western markets indicate no corresponding increase, preparatory to meeting the Spring demand; and the question of supply, independent of any foreign demand, becomes one of considerable gravity.

Provisions have shown an upward tendency in nearly all articles for which there is any export demand. Pork has been dull and drooping; the disproportionate quantity of Mess Pork packed, and the limited demand for export and home consumption, affords little encouragement to holders. Bacon and Lard, on the contrary, have advanced nearly a cent a pound, and were very active to-day. Beef has been more active. and Butter and Cheese have shown an upward tendency. The improvement in all except barrelled Provisions, seems to be due entirely to the active home and coastwise demand. The receipts are fully up to former years, except in Beef and Butter; but there is little foreign export, and yet prices advance.

Groceries have not been active. Coffees were quiet until to-day when favorable advices, both from Rio and Europe, led to considerable business. Sugars have receded to nearly the lowest point; and the foreign intelligence is not favorable to an early recovery; but to-day there was a good business at the decline. Molasses has been active; several cargoes of "new crop" have been sold. Rice tends downward. Teas have been active. Spices quiet. Fruits have been dull. Fish in more demand, and rather firmer.

In Naval Stores we notice large sales of Rosin at full prices, and Spirits Turpentine has advanced with considerable sales. Other Naval Stores have been quiet and unchanged. Oils have been quiet.

Petroleum has come forward in very great quantities, and prices show a further decline, without stimulating business.

Hides have been quiet, but Leather in good demand and firm.

Metals are generally dull and unchanged.

Tallow has been active; prices have improved a little in the past two or three days.

Whiskey has advanced. The probability that the present rate of taxation will not be disturbed, has induced the trade to supply its wants more freely.

Wool has been quiet.

East India Goods have been quiet, without important change in prices. Freighters have been dull; room on the berth is not plenty. Shippers will not pay the rates asked, and at the close, rates to British ports are nearly nominal.

The receipts of domestic produce for the week, and since Jan. 1, have been as follows:

LONDON, Feb. 10.—Baring's Circular reports :

COFFEE.—The market continues very firm, and all good qualities, especially colony descriptions, meet with most ready sale at extreme rates.

COPPER.—Tough Cake and Tile £96, best Selected £99, Sheathing £101 Y. M. Sheathing 94d.

HEMP.—Of 1180 bales Sunn about one-third was realized at £20 for fair.

JUTE remains quiet ; prices rule in favor of buyers. Of 4,900 bales offered about 600 bales sold from £17 15s to £26 5s for common to good quality ; 500 bales cuttings were held for £7 10s.

LEAD quiet ; Common Pig £21 5s to £21 15s.

IRON.—Welsh quiet ; Rails and Bars £6 15s to £7 f. o. b. in Wales. Scotch Pigs 68s 3d cash for mixed Nos. on Clyde.

LINSEED.—The demand has continued good, and sales of Calcutta on the spot made at 65s 6d to 66s. Bombay, January to March shipment to Liverpool, sold at 69s 6d, quay terms. About 3,000 qrs Odessa, February March shipment, per steamer to London, sold at 64s, 424lbs, L. A. T. Imports into London since 1st January 45,129 qrs against 90,090 last year.

LINSEED Oakes in demand. Best New York in barrels at £10 10s to £11, bags £10 5s to £10 10s.

NAVAL STORES.—Spirits turpentine are rather lower, and French offers at 45s, at which only a retail business is doing. Petroleum obtainable at 2s 7d. Spirits very much depressed and offer at 1s 3d to 1s 4.

OILS.—Fish: Crude sperm has sold at £117 to £118. Linseed has further advanced 1s to 1s 3d ; on the spot the price is 38s 3d. Rape is easier ; foreign refined £56, English £54 10s, brown £51 to £52 ; crude cotton £32 10s to £33, refined £37 to £38 ; Bombay Gingelly £50 ; Madras ground nut £51 to £52. Olive continues quiet ; Gallipoli £56 10s to £57 ; Malaga £53 10s ; Seville £53 to £53 10s, and Mogadore £50 10s to £51. Cocoa nut without change ; Ceylon 51s 6d to 52s, and Ceylon 46s 6d. In palm there is little doing ; fine Lagos 41s to 41s 6d.

For **RICE** the demand is very limited—11,000 bags were offered but all bought in, 11s 9d for new Basseein, and 12s 9d for fine Rangoon ; 2,448 bags Bengal sold at 14s 9d to 15s for good white.

SPELTER dull at £23 to £23 5s.

RUM.—About 200 puns have been sold at rather lower prices ; Demerara at 1s 7d for good, and 1s 8d for fine.

SALTPETRE is slow of sale—714 bags Bengal brought 23s 9d for 6½ per cent, and 24 (cash) for 4½ to 4¾ per cent.

SPICES.—Pepper: black ; market steady ; 1300 bags Singapore were held for 8½d ; 1200 bags Penang partly realised from 3½ to 3¾ for ord ; of 600 bags Tellicherry a few lots sold from 3½d to 3¾d. White : market quiet ; 100 bags ord Singapore were only partly disposed of at 5½d ; 50 bags fine Penang brought 6½d. 100 bags Bengal Ginger went from 26s 6d to 27s, being 6d dearer. Pimento dull ; 170 bags were bought in at 2½.

The **SUGAR** market has been extremely dull, and in the few transactions which have taken place easier prices have been accepted.

TALLOW.—The market closes quietly at 46s 9d on the spot and to March, and 48s 9d to 49s October to December.

TEA.—17,350 pkgs sold this week at public auction without reserve at about previous market rates. There are buyers of Green Teas for America at full prices. Good Common Congou is 1d to 1s 1½ per lb.

TIN.—Blocks 97s, Bars 98s, Refined 100, Straits 85s.

LIVERPOOL, Feb. 9.—With an active demand for Old BEEF large quantities have changed hands, and prices are now 2s 6d to 5s per tierce dearer ; New is very firmly held, and in some cases a small advance has been established.

PORK is very firm, but from the small supply of American the dealers turn their attention to Irish.

BACON is again dearer, the small stock enabling holders to make their own terms ; Irish and home cured have not advanced relatively with American, so there will probably now be a pause in the upward movement for the latter. HAMS have also advanced.

LARD has advanced fully 4s per cwt, and everything is cleared out of first hands ; the sales on the spot reach 150 tons.

CHEESE is very firm, especially for the finest qualities.

BUTTER is slow, and lower for medium descriptions.

TALLOW has improved 1s to 1s 6d per cwt, but is now quieter than early in the week.

LINSEED CAKE is a slow sale.

COTTON.

The market has been very excited and irregular. The European advances of the advance of a penny a pound, carried up this market fully three cents above the lowest pint, and gave speculative holders renewed encouragement to continue to carry stocks, the weight of which had become a pretty severe burden.

The advance in American cotton, while other descriptions declined in the Liverpool market, has led to some discussion as to the cause. The reasons, however, are evident, and grow out of the large and increased shipments from India since the beginning of the year. It is well known that the Surat cotton cannot be used to advantage except with the American staple. The increased supply, therefore, of the former has led to its decline, while less favorable interpretation of the accounts from this side has made the market for American active at higher rates. The shipments at Bombay, as given by our London correspondent in his letter published to-day, from Jan. 6th to Jan. 11th, were 61,732 bales, against 28,106 bales during the corresponding period of 1865.

This market has not fully supported the advance of Monday and Tuesday, but closes quiet. Sales of the week, 17,000 bales. The following are closing quotations :

LIVERPOOL, Feb. 10.—There has been a marked improvement in the tone of the market this week, but the principal nature has been the largely increased demand for American—one-half of the total sales of the week having been of this description. Prices of American have gradually hardened, and quotations show an advance of ½d. per pound on the week. Other sorts have but slightly improved in value, and East Indian has been neglected in proportion as the demand for American has improved, thus showing that spinners are returning to their old decided preference for the latter.

Friday the market has been active. Sales 15,000 bales, of which 8,000 are American, at an advance of ½d. per lb., which is represented in quotations below:

| | Ordinary and Middling. | Fair and Good. | Good and Fine. |

BREADSTUFFS.

THE market was very dull and depressed during the early part of the week; but on Wednesday and to-day there has been a better feeling. However, no decided advance can, as yet, be quoted.

The downward tendency of prices which has prevailed for some time, is due wholly to the impression that this market must meet the Liverpool demand for a supposed surplus. The accuracy of this impression begins to be seriously disputed. Indeed, the opinion is held by some that the supplies of flour and wheat are insufficient for home consumption, as the failure of the crop of 1865 in the Ohio valley, and in the same latitude east and west (where our finest wheats are grown), was more complete than is recorded in a score of years. The only quarters in which full crops of good wheat were raised are the far North West (where little besides Spring Wheat is grown), and Western New York, where a large crop is but a small quantity. Milwaukee, the great receiving depot for the Northwest, is now sending wheat to Louisville and St. Louis. So much for the supply; now for the demand. The regular trade of New York was never so large as at this season. We are supplying all the large towns about us—Boston among the number. The South, given up entirely to cotton raising, to the neglect of Breadstuffs, is already drawing heavily from, and will soon be wholly dependent upon this market. The return of Spring always brings a large peremptory demand from the Northeast. We shall be fortunate if we are able to meet all these requirements at the present relatively low prices. Stocks are everywhere light, and receipts at the great depots do not indicate a large accumulation on the opening of Spring.

At to day's market flour was quite active, and prices, except for unsound extra State, were generally better. The demand was especially pressing for good No. 2, and superiors; the latter brought more than inferior extra, which is very difficult to sell. Wheat was less pressed for sale, but the wants of the millers were not sufficient to lead to improved prices. Corn was a shade firmer. Oats, Rye and Barley were steady.

LIVERPOOL, Feb. 10.—The arrivals of wheat to this port during the week have been large, and of Flour excessive, mostly from France; those of Indian Corn moderate.

The arrivals of grain cargoes at ports of call have also again been numerous. 157 cargoes of Wheat, and 107 of Maize have arrived since 1st January; 45 cargoes of Wheat and 33 of Maize still remain unsold.

The trade has been inactive, with prices tending downwards, especially for Flour.

The weather continues mild but very boisterous.

At Tuesday's market there was but a moderate business in Wheat at Friday's decline. Flour was unsaleable. There was but a moderate consumptive demand for Indian Corn, and no material change in prices.

At to day's market there was a very thin attendance of buyers, and in the almost total absence of business, quotations for all articles remained nominally as on Tuesday, though holders would generally have been willing to make some concession as it would have induced business.

THE DRY GOODS TRADE.

The Dry Goods Market is in a very dull and unsettled condition, the occurrence of the holiday in the middle of the present week has serv-

ed to greatly unsettle business. A large number of country merchants have been in town waiting the "break" which seemed inevitable, but declining to buy at the rates asked. The condition of financial affairs and the remembrance of the decline a year ago has had a depressing effect causing buyers to hold aloof. They will not take goods except in very small quantities, unless at an immense reduction; holders seem determined not to concede to this demand. Some Jobbers, however, have placed a few pieces of standard makes of domestic goods on their floors at greatly reduced figures but without effect. An auction sale, including a few bales of domestics, was held on Wednesday morning at which the goods were sold at a sacrifice there being few buyers and those unwilling to purchase under present circumstances. This further depressed trade and the week closes with prices unsettled and apparently on the eve of a decline not unlike that of last spring. The spring trade as yet amounts to but very little compared with the business done last fall, and should it continue dull for a week or two dry goods will be a drug in the market.

BROWN SHEETINGS AND SHIRTINGS are in request for standard makes to some extent, while all other grades are dull and declining rapidly. Standards are quoted at 30 cents by agents, while jobbers are selling by a few pieces at a time at 27½ in an endeavor to attract attention thereby. At auction on Wednesday Nashua extra which were held by agents at 27½ last week sold at 22 cents, and some other domestics in proportion. The quotations below are nominal as with so unsettled a market prices cannot be determined for but the time being. Atlantic heavy A 37 inch are quoted at 30 cents, Atlantic P A, A H, and P H 29, one cent less than last week; Atlantic heavy shirtings A, V 26, do A G 25, do fine shirtings A L and P L 36½ inch 25, and shirt 33 inch 24, though these goods have been sold at less figures; Auburn, 36 inch 20, Indian Queen 36 inch 23, New England 36 inch 24, Pittsfield 36 inch 23, Rocky Point shirt 36½ inch 24, and Wa Wa Wanda 36 inch 26 Augusta Mills 4-4 27½, Appleton A are quoted at 30 cents, B 40 inch 33, C 25, D 27, W 43 inch 45, shirt E 30 inch 20, do N 30 inch 25, Phoenix M Co 36 inch 25, do 39 inch 26½, World Wide 36 inch 20 Grafton 28 inch 18½, Shetucket B 27 inch 18, do A 19. WHOLESALE.

All goods deposited in public stores or bonded warehouses must be withdrawn therefrom, or the duties thereon paid within one year from the date of the original importation, but may be withdrawn by the owner for exportation to Foreign Countries, or may be transhipped to any port of the Pacific, or Western Coast of the United States, at any time before the expiration of three years from the date of the original importation, such goods on arrival at a Pacific or Western port, to be subject to the same rules and regulations as if originally imported there; any goods remaining in public store or bonded warehouse beyond three years shall be regarded as abandoned to the Government, and sold under such regulations as the Secretary of the Treasury may prescribe. Merchandise upon which duties have been paid may remain in warehouse in custody of the officers of the customs at the expense and risk of the owners of said merchandise, and if exported directly from said custody to a Foreign Country within three years, shall be entitled to return duties, proper evidence of such merchandise having been landed abroad to be furnished to the collector by the importer, one per centum of said duties to be retained by the Government.

In addition to the duties noted below, a discriminating duty of 10 per cent. ad val. is levied on all imports under flags that have no reciprocal treaties with the United States.

On all goods, wares, and merchandise, of the growth or produce of Countries East of the Cape of Good Hope, when imported from places this side of the Cape of Good Hope, a duty of 10 per cent. ad val. is levied in addition to the duties imposed on any such articles when imported directly from the place or places of their growth or production; Raw Cotton and Raw Silk excepted.

In addition, they expended for the Susquehanna bridge \$347,704.70, and for the second track \$163,063.81, total \$510,768.51— from which deduct the surplus \$69,282.66, leaving by this sum \$441,485.85, the balance to the credit of revenue Nov. 1, 1864.

CHICAGO AND ALTON DIVIDEND.—At a meeting of the directors of this company on the 15th inst, a tax free cash dividend of five per cent on both preferred and common stock was declared. At the same time new stock was distributed to the stockholders, in the proportion of one common share to every two shares of either class held, the holders to pay therefor at the rate of \$30 cash per share. This is equivalent to an additional dividend of 35 per cent. The stock account before and after this transaction shows as follows:

| | | | |
|---|-------------|-------|-------------|
| Common Stock—before dividend.... | \$1,783,100 | after | \$3,887,250 |

Railroads.

OFFICE OF THE

Chicago & Northwestern

RAILWAY COMPANY,

No. 8 WALL STREET.

Offers will be received until the first day of March proximo for \$350,000 of the Consolidated Sinking Fund Convertible Mortgage Bonds of this company. These bonds are a portion of \$2,000,000 issued for the purpose of providing additional rolling stock required to accommodate the growing business of the company and for the equipment of the additional road now in course of construction to Omaha, on the Missouri; and the mortgage provides for a further issue of \$500,000 more of said bonds (\$2,500,000 in all), hereafter, for the same purpose, if such issue shall be found necessary.

The bonds bear date Jan. 16, 1865, carry 7 per cent. interest, payable quarterly in New York; have fifty years to run, and are secured by a deed of Trust to Samuel J. Tilden, Esq., upon all the company's lines of road and equipment in the States of Illinois and Wisconsin, amounting to about 650 miles of road, more than 100 miles of which are subject to no other mortgage. This mortgage, together with all other liens, amount in the aggregate to only \$30,000 per mile upon said roads.

Provision is also made in the mortgage for the absorption, at the discretion of the Board of Directors, of all prior liens into this class of bonds, in the expectation that eventually all the other bonds of the company will be exchanged for these, leaving this class of bonds the only mortgage lien upon the company's entire lines of road.

These bonds are convertible into the preferred stock of the company, at the option of the holder, any time prior to Jan. 1, 1870. For further particulars inquire at the company's office.

The Cabin accommodations of these ships are not excelled by any Steamers on the coast, and although their carrying capacity is large, their draught of water enables them to insure a passage without detention in the river.

This Company insures at customary rates of premium against all Marine and Inland Navigation Risks on Cargo or Freight; also against loss or damage by Fire.

If Premiums are paid in Gold, Losses will be paid in Gold.

The Assured receive twenty-five per cent of the net profits, without incurring any liability, or, in lieu thereof, at their option, a liberal discount upon the premium.

All losses equitably adjusted and promptly paid.

ORGANIZED APRIL, 1844.

The Company has paid to its Customers, up to the present time, Losses amounting to over

EIGHTEEN MILLIONS OF DOLLARS.

For the past nine years the cash dividends paid to Stockholders, made from ONE-THIRD of the net profits, have amounted in the aggregate to

One Hundred and Twenty-one and a half per cent.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company will hereafter make such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the net profits remaining at the close of the year, will be divided to the stockholders.

This Company continues to make Insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds, Hulls, and Freight.

Policies issued making loss payable in Gold or Currency, at the Office in New York, or in Sterling, at the Office of Rathbone, Bros. & Co., in Liverpool.
